WHY AQUA VOLANT
TECHNICAL ?

Introduction

Aqua Volant Technical Services LLC is a company based in Dubai, with an expertise of over 25 years in project management, covering all Middle Eastern countries. The company utilizes state-of-the-art technology and infrastructure to ensure that quality and prompt delivery are prioritized for the benefit of our clients. We are committed to delivering efficient and cutting-edge services that will enable our clients to surpass their business objectives, using our skilled personnel and the best technology. Our core competence lies in our ability to deliver quality and affordable services to our clients; building on our legacy of professionalism, efficiency and timely project execution. Our quality consultancy & services solutions help in bringing to life projects from different industries.

What We Do

CONSULTANCY

At Aqua Volant we provide expert advice & well drafted plans in various industries, having the perfect blend of western expertise and local experience. We have been on the ground during all stages of development and have been participant in key projects executed across the Middle East.

SPECIALIZED CONTRACTING

Aqua Volant is committed to provide high standards & cost-effective services, designed to ensure our customers receive the correct products, technologies and applications every time required. We are active across many industries, such as Leisure Parks, Oil & Gas, and Construction.

RENOVATIONS AND FIT-OUT

Aqua Volant has a specific and dedicated renovations and fit out project management team that has delivered successful high specification renovation and fit-out for a number of companies and homeowners, across the Middle East.

Environmental Management

At Aqua Volant, we contribute to our environments and develop structures which may last centuries. With this in mind, we are future centric in terms of the design and technology we use and apply. We recognize the importance of utilizing the most modern and most sustainable materials within the construction process. We are proud to have been apart of quite a number of iconic projects which have broken new grounds in terms of sustainable materials and innovative construction techniques. AVT continuously strives to perform to sustainable best practice in construction is our mission to make a difference to the environment.

ENVIRONMENTAL POLICY

AVT Management team is committed to provide safe working environment, prevention of pollution and environmental degradation. We would endeavour to achieve this by:

- Identifying environmental aspects and impacts associated with our services.
- Reducing any nuisance to the community and preventing environmental pollution to the extent that is practically possible and within the limits of each contract.
- Establish objectives for our activities to reduce water, conserve energy, protect water resources, minimize ground contamination, protect wildlife, natural features, control emissions to air and chemical usage, minimize nuisance from noise, vibration, duct and odour.

AVT is committed to safeguard the environment and shall adopt as reasonably practicable control measures. To Pursue our efforts in this direction we would:

- Ensure that the objectives are communicated down through the organization so that each level understands its role in the achievement of the objectives.
- Carryout environmental impact assessments, Environment management system audit and review schedules. We consult with our employees and make them aware of their responsibilities to adhere to safe work practices.

All AVT employees are responsible and accountable for interpreting company Environmental objectives into positive production actions.

This policy shall be communicated to all employees and made available to interested parties

Alexander N. Turnbull
Managing Director

Environmental Policy

Quality Management

Quality is of paramount importance to all team members at Aqua Volant. We are continually evaluating and improving the level of service we offer our clients to ensure the reputation for quality of which we pride ourselves in is maintained and grown. We are committed to providing projects that are not just fit-for-purpose, but which exceed expectation in terms of quality of build and functionality. Our reputation for both the quality of our project management and finished projects is achieved through our proven Quality Management System.

Health & Safety

We, AVT have established the “HSE (Health, Safety and Environment) policy” and implemented our HSE management system based on international standards to promote the development of our business, considering occupational health and safety, and environment We strive to improve our HSE performance continuously, by implementing risk assessments, ensuring compliance with applicable laws and regulations, implementing training , conducting HSEactivities in collaboration withcontractors at our operational sites, verifying HSEmanagement, and implementing HSEaudits and management review, etc.

Health & Safety

Our Director and staff are totally committed to the implementation and continuous improvement of the Integrated Management Systems governing our Health, Safety, Environmental and Quality Codes of Practice. These systems are living documents that are continually reviewed and improved in line with industry best practice. First and foremost the guarantee of the health and safety of our employees and of all those effected by our construction operations is an absolute pre-requisite to conducting any work at any time. We have developed our systems and procedures over many years based on these ethics.

Health & Safety

We believe that the Health and Safety of people and protection of the Environment (HSE) is one of the most important missions of an exploration and production

We will comply with laws and regulations ethically, and set and maintain our HSE management system to the highest level for the development of sustainable society with harmony between people and the environment.

OCCUPATIONAL HEALTH & SAFETY POLICY

As a professional international company AVT Technical Services LLC, we fully understand the need for exemplary health and safety practices. We take the matter very seriously in consideration of our staff's welfare and safety. As a direct result AVT has established:

- a) A Health and Safety continuous improvement plan.
- b) Maintains Health and Safety compliance throughout the company by awareness training.
- c) To investigate & report any Accidents or incidents (Near Miss) in a responsible manner.
- d) To record, monitor and publish statistics related to Accidents or incidents (Near Miss) for improvement target achievement

This is maintained through the use of Method statements, Risk Assessments, Training of staff, Toolbox sessions and the provision of appropriate PPE. As a direct result of these actions we are aimed to have zero serious accident record throughout the company.

- 1.1 The Company has an established Health and Safety Policy which clearly identifies our understanding of the Health and Safety concept and is actively incorporating it into the performance and management of our day to day business.

Our Health and Safety Policy is communicated to all our employees without prejudice to every level within our organisation. Each on site Employee receives an abbreviated version of this in the form of an Employee Handbook for instant reference should this be needed.

- 1.2 The prevention of accidents and ill health is one of the most important functions of all our Managers and Supervisory staff at AVT and based on this statement we ensure that on all our projects the required qualified staff are allocated.

- a) We do not want any employee or other person to suffer as a result of our work.
- b) We intend to comply with all health and safety legislation.
- c) We recognise that accidents, unsafe and unhealthy working conditions can be a considerable drain on the financial resources of the Company and demonstrate a lack of efficient management.

- 1.3 Throughout our Group, our Management team lead by example our Management and Supervisory Staff has the responsibility for implementing this Policy throughout the Company and must ensure those Health & Safety considerations are always given priority in planning and day-to-day supervision of work.

All Employees and Sub-contractors are expected to co-operate with the Company in carrying out this Policy and must ensure that their own work, so far as is reasonably practicable, is carried out without Risk to themselves or others within Our Group Organization chart.
